

TEKSTİL YAĞI 20

Description

It is a high-quality, refined paraffinic-based textile oil. Its advanced technology formulation ensures maximum lubrication and protection in the system where it is used.

Applications

It is used in various machines in the textile industry, such as weaving looms for twisting and winding, as well as in the needles of weaving looms and the components of binding machines. Additionally, it can be used in hydraulic systems and bearings where low-viscosity oil is suitable.

Benefits

- It does not cause varnishing and sticking thanks to its high oxidation resistance.
- It helps increase production efficiency and quality.

Typical Specifications*
